

RAINBOW PAPER

Who doesn't want to capture a rainbow and take it home! Today we will explain how to make your own rainbow paper. You can use this to add to a homemade card, make a picture or just keep them tucked away for a cloudy day when you need some color!

Gather the below material:

- Bowl
- Water
- Small pieces of black construction paper or card stock (about 3-5 inches)
- Clear nail polish
- Paper towels

1. Lay out several paper towels

2. Fill bowl with water

3. Open your clear nail polish and let a few drops fall into the bowl of water

4. Wait a few seconds and dip your black paper or card stock into the bowl with the nail polish

5. Pull your paper out after 2-3 seconds and lay on the paper towels to dry

6. After a few minutes your paper should be dry

7. Tilt your paper in different directions to see the rainbow pattern

Each rainbow will be different just as each rainbow in nature is different! Make several rainbows to share with your friends and family. Cut out different shapes and add to a homemade card to add a smile and color to somebody's life!
